About the price of precious metals

The prices for gold and silver are prices expressed in Moldovan Leu for a gram of fine gold and for a gram of fine silver.

The gold price and the silver price are determined by the National Bank of Moldova each working day and become valid starting with the next working day. On weekend (holidays) the gold price and the silver price of the previous working day are valid.

The determined prices for gold and silver are used by the National Bank of Moldova in order to reflect the equivalent in Moldovan Leu of monetary gold in the bookkeeping of the National Bank of Moldova, as well as in order to establish the price for commemorative coins from gold and silver issued by the National Bank of Moldova.

There are no any obligations for the National Bank of Moldova to perform banking transactions with precious metals using these prices.

Following the written requests to the National Bank of Moldova on the prices for gold and silver, the National Bank of Moldova communicates in written form the requested information under the terms and the procedures established by the acting legislation.
