Money transfers from abroad in favor of individuals (resident and nonresident) represent amounts of money remitted in the country through the national banking system, including international money transfer systems. **Net** settlements contain data on transfers via money remittance systems, based on clearing between the system and the licensed bank (balance between inflows and outflows). **Gross** settlements represent amounts of transfers via money remittance systems released to individuals.

Amounts are converted from the original transfer currency into US dollars at the official exchange rate of the NBM on the transfer date. It should be noted that the origin as well as the purpose of these amounts can be varied. They include, besides the amounts transferred by Moldovan migrants, other foreign exchange transfers. Data do not include settlements with banks located on the left bank of the Nistru River.

Statistical series on money transfers from abroad made in favour of individuals via formal channels, as well as their currency structure, can be found on the official website of the National Bank of Moldova at:
