Increasing awareness and capacity building on sustainable finance

The National Bank of Moldova, in collaboration with the International Finance Corporation (IFC), organized two training sessions in December for representatives of licensed banks, the Association of Banks in Moldova, the National Commission for Financial Markets, and ministries involved in sustainable finance activities.

The first session, held on December 3, 2024, titled „Sustainable Finance Strategy Development for Financial Entities", provided participants with the opportunity to learn about the key elements of a sustainable finance strategy, the relevance of global and European frameworks in this field, the importance of taxonomy in defining and classifying sustainable economic activities, and the benefits of adopting sustainable finance practices.

In the second session, held on December 11, 2024, titled „Sustainability Transformation of Financial Entities and Sustainable Finance Opportunities", the participants learned about the key elements of the sustainable transformation of financial entities, sustainable finance opportunities in key sectors of the economy, the development of climate technologies, and their practical applications.

These activities were carried out as part of the implementation of the Sustainable Finance Roadmap [1], particularly under Pillar I: Increasing Awareness and Capacity Building.
