NBM, an active part of the team building Moldova's European future

The National Bank of Moldova (BNM) has launched a new explanatory video highlighting its contribution to the Republic of Moldova's integration into the European Union. The video, entitled "What the NBM does for Moldova's integration into the European Union," provides a clear picture of the concrete measures through which the central bank is contributing to building a stable, secure financial system aligned with European standards— key pillars of a modern economy and real opportunities for all citizens.

The NBM's involvement in Moldova's EU accession process is carried out across several strategic directions. The institution actively participates in legislative, institutional, and functional transformations aimed at strengthening a predictable and competitive financial framework. At the same time, the NBM is leading Moldova's negotiations with the EU on three key chapters: free movement of capital, financial services, and monetary policy.

"We are working to ensure that Moldovans benefit from the same secure and accessible financial services as European citizens. It is our firm commitment to support Moldova's accession to the EU through concrete actions, in order to achieve a stable, resilient, and inclusive economy," said Anca Dragu, Governor of the National Bank of Moldova.

This initiative is part of a series of educational materials launched by the NBM on 9 May 2025, on the occasion of Europe Day, aimed at explaining in accessible language what European financial integration entails and how the central bank contributes to this process.

The National Bank of Moldova will also play an active role in implementing the National Accession Program of the Republic of Moldova to the EU for 2025–2029, recently approved by the Government. As part of this strategic national effort, the NBM reaffirms its commitment to supporting, through its policy and regulatory instruments, the harmonisation of the financial and monetary framework with European standards and requirements.
