Technical Box: Petroleum products in the Republic of Moldova: the formation and evolution of maximum retail prices

Petroleum products in the Republic of Moldova: the formation and evolution of maximum retail prices [1]

The maximum retail prices for main standard petroleum products (95-octane gasoline and diesel) are calculated and published every business day (by 12:00) by the National Agency for Energy Regulation (ANRE) on its official website. These prices are valid starting at 00:01 on the day(s) following the day on which they were set and are calculated in accordance with the methodology for calculating and applying prices for petroleum products. Thus, the maximum retail prices for main standard petroleum products are calculated per litre, separately for each type of main standard petroleum product.
