NBM organizes a series of events on the occasion of its 30th anniversary

The National Bank of Moldova (NBM) kicks off several events that will be organized in the context of the 30th anniversary of its founding.

"4 June is an essential date in affirming the independence of the Republic of Moldova. The National Bank of Moldova was established 30 years ago and thus the foundations of the banking system were laid without which it was not possible to initiate the transition to a market economy. During this time, the banking system has been subject to many tests, we have accumulated knowledge, experience and I am confident that we will continue the path of reforms with tenacity and responsibility, building a strong, transparent and reliable banking system as we wish ", states Octavian Armașu, Governor of the NBM.

As from today, 1 June 2021, the central bank will launch the video series "NBM People". Respectively, NBM will publish, during 30 days, on its communication platforms a story of an employee, who will share his experience as a member of the National Bank's team, as well as moments from his personal life.

Also today, on the International Children's Day, the central bank will organize an online event named "In the MDL coin's world" for preschoolers from different parts of the country. This is the generic of the financial education event, during which children will learn in an easily accessible way about the history of money, the security signs of the national currency and will make a virtual tour at the NBM.

At the same time, on 4 June 2021, when the NBM will mark its 30th anniversary, there will be organized a high-level conference "Economic recovery in the post-pandemic: realities and perspectives". The event will bring together officials of the Republic of Moldova and international organizations, governors of central banks from other states, representatives of local commercial banks, the business environment, as well as the economic experts. The conference will provide an opportunity for a dynamic exchange of views and experience on the role of central banks and the banking community in supporting the economy after the pandemic crisis.

The agenda will include issues related to the post-pandemic challenges of central banks, the approach to systemic risk, the framework for maintaining financial stability etc. Thus, the conference aims to reveal how the pandemic has changed us and the possibilities for a proper further development.

The meeting will take place online and will be broadcasted live on all NBM communication platforms (website, Facebook, YouTube), but also on https://www.privesc.eu/ [1] and https://rlive.md/ [2]

Details will be published on https://www.bnm.md/ [3] and https://www.facebook.com/BNMoficial [4].
